

Examples of scientific postgraduate studies conducted at the College of Nursing that serve community.

Specialty	Projects' Titles
2011/12	
Ob. Gyn.	Effect of using two different pushing techniques in the second stage of labor on the level of early postpartum fatigue among Saudi women and their newborn outcomes
Ob. Gyn.	Effect of midwife's continuous support for women on third labor outcomes
Ob. Gyn.	Effect of early and late clamping of the umbilical cord on the newborn' blood analysis
Ped.	Effect of lidocaine and prilocaine (EMLA) cream, oral sucrose and both in alleviating neonatal circumcision pain
Ob. Gyn.	Effect of application of warm perineal packs on the perineal outcomes among primiparous women during the second stage of labor.
Ob. Gyn.	Effect of ginger capsules intake on treating nausea and vomiting in early pregnancy.
Ob. Gyn.	The Efficacy of early and late breast feeding on the fundal level and uterine consistency.
2012/13	
Ob. Gyn.	Effect of supportive care therapy for women with recurrent miscarriage on anxiety level and pregnancy outcome.
Ob. Gyn.	Effectiveness of using olive oil during vaginal examination on the second stage of labor outcomes.
Ob. Gyn.	Impact of Leopold's maneuver simulation training program on the nursing student professional competence
Critical Care Nursing	The efficacy of licorice gargle for attenuating postoperative sore throat.
Ob. Gyn.	The effect of mother and newborn early skin-to-skin contact on the duration of separation and expulsion of the placenta.
Ob. Gyn.	Effect of early oral hydration on post-cesarean outcomes
Pedia. Nursing	Effectiveness of head mist versus tepid sponging among febrile children: a comparative study.
Pedia. Nursing	Effect of health education program of needle free insulin injection on pain sensation and glycemic control among type 1 diabetic children.

Specialty	Projects' Titles
Psych. Nursing	The relationship between psychiatric inpatients' perception of ward atmosphere and their psychological wellbeing.
2013/14	
Pedia. Nursing	Effect of frequent code blue training program on the performance of pediatric nurse.
Pedia Nursing.	The effect of health education program for caregivers on circumcision outcome in neonates & infants.
Psych. Nursing	Nursing staff perceptions toward management approaches of aggressive behaviors among psychiatric patients.
Psych.	Knowledge and attitudes of mental health care practitioners toward psychiatric patients' right.
Pedia. Nursing	Assessment of nurses' performance of the central venous catheter care for children with cancer.
Pedia. Nursing	Effect of lidocaine-prilocaine eutectic mixture of local anesthetic cream compared with oral sucrose or both in alleviating pain in neonatal circumcision procedure.
2014/15	
Community Health Nursing	Developing a competency framework to underpin the primary health care nurse's role as a health educator in Saudi Arabia.
Critical Care Nursing	Validation of pain assessment tools in critically ill mechanically ventilated patients.
Critical Care Nursing	Effect of massage therapy on the mood and pain of post-operative cardiac surgery patients.
Critical Care Nursing	Evaluation of Pain Assessment Tools in Critically III Mechanically Ventilated Patients
Critical Care Nursing	Comparison of the routinely oral end0- tracheal tube securement techniques on facial skin and oral mucosa pressure ulcer in critically ill patients.
Pedia. Nursing	Effect of local ice back application prior to venipuncture on pain response among children.

Specialty	Projects' Titles
Pedia. Nursing	Effect of breast feeding VS oral sucrose on pain relief during vaccine intramuscular injection among infants.
Pedia. Nursing	Effect of Animated Cartoons on behavioral response to pain among school age children under going venipuncture
