	<p>I received my Master of Architecture degree from the Faculty of Environmental Design, University of Calgary, Canada. I have successfully run my architectural practice in partnership with fellow architect, Kamran Rasheed for over two decades. During this professional career, I have designed and overseen construction of residences, apartments, office interiors, mosques and schools. The focus of my design input has always been to celebrate cross fertilization of different realms of knowledge, solve problems using refined graphical language as space mediator/organizer, promote neatness and sobriety in spatial layouts, and honor landscape and integrate it in built structures.</p>

I have been actively involved in education, teaching students of all ages ranging from junior school to University level. Currently, I am a faculty member at the Department of Interior Architecture, Imam Abdulrahman Bin Faisal University, Saudi Arabia. My ongoing research focuses on the effects of a system of economy on the built environment with the aim to formulate guide lines for a sustainable post-capitalist built-environment. My interests include reading, writing, travelling, socializing, reflecting, and music.
