#### Brief Description of Undergraduate Courses Taught: (Course Title – Code: Description)

1	<b>Computer Networks (CS120):</b> Familiarity with the basic concepts of computer networks, the principles of local area networks and wide. Protocols, local area networks and wide	
2	<b>Web-based Design (IT210):</b> This course aims to equip students with the necessary knowledge to design and implement Intranet applications. It emphasizes on the specific technologies of these applications and how to employ them in building effective and efficient applications. It also aims to Familiarize the students with technical characteristics of the Internet protocols.	
3	<b>Programming Fundamentals (cs110):</b> This course will provide students with skills and concepts that are essential to programming practice independent of the underlying paradigm and programming language. The course will be accompanied by a practical part (lab) in which the students will learn popular C programming tools/applications and programming techniques.	
4	<b>Graduation Project (CS340):</b> In the course “graduation project 1” the students choose a topic, define objectives and write a project proposal that should be approved by the supervisor. Upon approval, the student proceeds by defining the requirements, setting software specifications, providing different system models and architectural design (the SDLC phases that have been covered in software engineering 1).
