DEANSHIP OF SCIENTIFIC RESEARCH

The research laboratories at the College of Dentistry help researchers to improve the materials needed to complete their tasks, and these research laboratories include:

Lab Name

Lab Definition

Research lab D32

A laboratory that provides multiple research devices and equipment that have been provided to support research projects for faculty members in the college

Dental Biomaterials Research Laboratory

Aims to develop new materials that enhance the treatment of oral diseases and injuries, including materials that promote dental adhesiveness and remineralization, tissue regeneration and/or convey antibacterial and antifungal effects.

Oral Biology Research Laboratory

Studying the nature of oral and maxillofacial tissues in health and diseased states. It focuses on histopathological features of cells/tissues in clinical or experimental specimens representing oral pathologies and cancer.
